A Magical Parade

The music, the food, the culture, that's what I loved about parades but very soon that would all change. It was a normal day in Rio de Janeiro, and by that, I mean there was another parade. I've never seen anyone get tired of these festivals. At first when I got to the parade, everything seemed normal. It was bright and colourful. But then I saw something that raised eyebrows. The plants around and on the floats seemed to be dancing along with the music. That made me want to watch out for more. I started noticing more absurd things like the bright red floats floating and fruits growing in real time. Then I realized that parades are truly magical.
