Beyond the Horizon

Is the horizon just a metaphor for our limitations? Does it represent the edge of our knowledge, the boundary of our understanding? Most believe it's a reminder that there's always more to learn, more to discover, and more to explore. I, for one, believe that it's fair to say that without the curiosity to go beyond the horizon, the MOMENTS of inspiration in many great individuals that have collectively made humanity great wouldn't exist. Let me explain.

History has shown that us humans are very ambitious. Go back to the 18th century, we see brilliant minds like John L Baird inventing television. They believed they could fly so the Wright brothers invented the aeroplane. Some say by luck but NO!, I say by being a visionary! George Eastman came up with the simple yet elegant Kodak camera. To top it all up, let's not forget Ferdinand Magellan who took the words 'BEYOND THE HORIZON' literally and became the first person to sail around the world.

Now, as we journey beyond the horizon, thanks to fancy technology; aircrafts, electric trains, we encounter new landscapes, new cultures, new ideas, and, of course, new food. We meet people who challenge our assumptions and broaden our perspectives. We discover hidden strengths and talents within ourselves, and we develop a deeper understanding of the world and our place in it.

The horizon is full of uncertainty, yet knowing this doesn't stop us because we know beyond it is a future that WE can shape and create, through our choices and actions. It's a future that beckons us to explore, to innovate, and to push beyond the boundaries of what's possible.

In conclusion, the horizon should a symbol of our potential, as a country, a continent, a globe. Let it be a reminder of the infinite possibilities that lie beyond our reach. It should challenge us to explore, to discover, and to create. As we gaze out at the horizon, let us be inspired to venture forth, to push beyond the limits of what's possible, and to create a brighter future for ourselves and for generations to come
